 GMet Forecast Office

24-HOUR FORECAST FOR GHANA VALID FROM 6AM TODAY

SUMMARY: Mist and fog patches will form over coastal, forest, and mountainous areas this morning. As the day progresses, dry and hazy conditions of varying intensities will continue to affect most places within the country. However, some cloud development is anticipated over southern Ghana which could lead to localized showers over few coastal and inland areas from afternoon into the evening. Visibility is expected to range between **4000 meters** and **9000 meters** across the country.

CAUTION!

1. **Naked fires should be handled cautiously to prevent any form of fire outbreak due to the dryness in most parts of the country.**
2. **Motorists are advised to use fog lights and drive within appropriate speed limits due to deteriorated visibility.**
