SUMMARY: Mist and fog patches are forecast to form this morning over coastal, forest, and mountainous areas. Later in the day, cloud formations are expected to form, mainly over southern Ghana, with the possibility of rain showers over the west coast and some inland areas. Dry and hazy weather will continue to dominate the northern sector and transition belt throughout the forecast period, with visibility ranging from **3000 meters to 9000 meters** across the country.

CAUTION!

- Naked fires should be handled cautiously to prevent any form of fire outbreak due to the dryness in some parts of the country.**
- Motorists are advised to use fog lights and drive within appropriate speed limits due to deteriorated visibility.**
