24-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table				
Likelihood ↑	High (>60%)	G	H	I
	Medium (40% - 60%)	D	E	F
	Low (<40%)	A	B	C
		Low	Medium	High
		Impact →		

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	34
Forest	23	36
Transition	23	36
Northern	19	38

SUMMARY: This morning, misty weather will dominate most areas within southern Ghana with few cases of fog patches expected over the forest and mountainous areas. As the day grows, cloud formations are expected with the possibility of rain showers with occasional thunderstorms for some areas within the coastal and middle sectors, from late afternoon into the evening hours. Dry and hazy weather will persist across the northern and transition sectors throughout the forecast period. Visibility is expected to range from 3000 meters to 9000 meters across the country.

CAUTION!

- Naked fires should be handled cautiously to prevent any form of fire outbreak due to the dryness in some parts of the country.
- Motorists are advised to use fog lights and drive within appropriate speed limits due to deteriorated visibility.
