

24-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table			
Likelihood ↑	High (>60%)	G	H
	Medium (40% - 60%)	D	E
	Low (<40%)	A	B
		Low	Medium
		Impact →	

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	34
Forest	24	37
Transition	22	36
Northern	23	38

SUMMARY: Early morning mist and fog patches will form over the coastal, forest and mountainous areas giving way to sunny conditions across southern Ghana as the day progresses. In the afternoon, cloud formation is anticipated over the coastal and inland areas with a likelihood of rain and occasional thunderstorms extending into the evening. Meanwhile, the northern and transition sectors will remain predominantly dry and hazy throughout the forecast period. Visibility across the country is forecasted to range between 3000 meters to 9000 meters.

CAUTION!

- Naked fires should be handled cautiously to prevent any form of fire outbreak due to the dryness in some parts of the country.
- Motorists are advised to use fog lights and drive within appropriate speed limits due to deteriorated visibility.
