

24-HOUR FORECAST FOR GHANA VALID FROM 6AM TODAY

SUMMARY: This morning, mist and fog patches are anticipated over coastal, forest, and mountainous areas, gradually giving way to sunny and slightly hazy weather over southern Ghana. As the day progresses, cloud development may result in localized rain, with or without thunderstorms, particularly along the coast and some inland areas from afternoon into the evening. Northern Ghana, will remain fairly dry and slightly hazy, with higher intensity over the extreme upper regions. Visibility across the country is expected to range between **600** meters and **9,000** meters.

CAUTION!

1. ***Naked fires should be handled cautiously to prevent any form of fire outbreak due to the dryness in some parts of the country.***
2. ***Motorists are advised to use fog lights and drive within appropriate speed limits due to deteriorated visibility.***
