

24-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table				
Likelihood ↑	High (>60%)	G	H	I
	Medium (40% - 60%)	D	E	F
	Low (<40%)	A	B	C
		Low	Medium	High
		Impact →		

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	25	33
Forest	24	36
Transition	22	37
Northern	22	39

SUMMARY: Dry and hazy weather of varying intensity is expected to affect the northern and transition sectors throughout the duration of the forecast. Misty condition with patches of fog will dominate areas along the coast, forest and hilly places of Southern Ghana this morning. As the day goes on, sunny weather will be observed across the country. However, there are few cases of thunderstorms or rain over portions of the coastal and middle sectors from late afternoon into the evening hours. **600 meters to 9000 meters** visibility range is expected across the country.

CAUTION!

- Naked fires should be handled cautiously to prevent any form of fire outbreak due to the dryness in some parts of the country.**
- Motorists are advised to use fog lights and drive within appropriate speed limits due to deteriorated visibility.**
