

 Rainstorm Currently Affecting Southern Ghana

 **Urgency:** Immediate

 **Severity:** Severe

 **Certainty:** Observed

Issued:	Effective:	Onset:	Expires:
Tue 29 Apr 2025 18:15	Tue 29 Apr 2025 18:00	Tue 29 Apr 2025 18:00	Tue 29 Apr 2025 21:00

Area:
southern Ghana

Description:
The previously forecasted rainstorm has now arrived and is currently affecting parts of southern Ghana. Moderate to heavy rainfall is occurring across the areas, accompanied by strong winds. Flash flooding is likely in vulnerable areas due to the intensity of the rainfall, and damage to structures or property is possible because of the high winds.

Instruction:
Stay indoors and away from windows during the storm Avoid crossing flooded roads, bridges, or low water crossings Keep children away from drainage systems and flooded areas Temporarily discontinue outdoor activities Seek higher ground if in flood-prone

locations Secure loose objects outside homes and businesses Drive with extreme caution if travel is absolutely necessary Report any emergencies to local authorities immediately
