

Flash Flood Alert: Active Rainfall potentially leading to isolated flooding

Urgency: Immediate

Severity: Severe

Certainty: Observed

Issued:

Sun 18 May 2025
15:16

Effective:

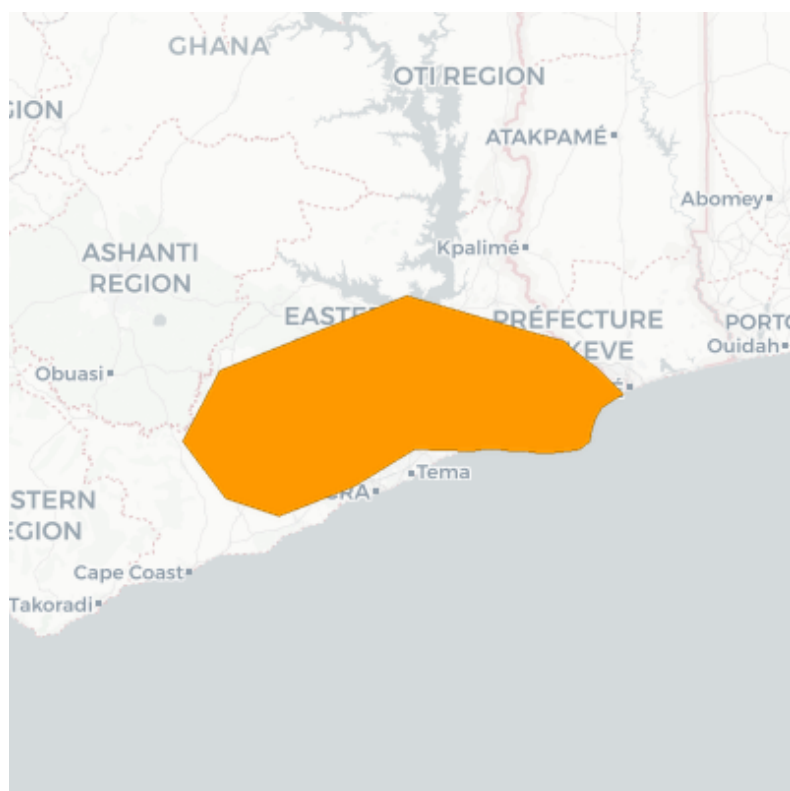

Sun 18 May 2025
15:15

Onset:

Sun 18 May 2025
15:15

Expires:

Sun 18 May 2025
18:00

Area:

Kasoa, Pokuase, Kwabenya and surroundings

Description:

The predicted rainstorm has intensified to moderate and heavy rainfall across coastal Ghana and some inland areas and is now likely to cause isolated flash flooding. This situation requires immediate attention as flood waters may rise quickly in additional communities within the next few hours.

Instruction:

Residents in affected areas should take immediate protective actions: Move to higher ground immediately if you observe rising water; do not attempt to cross flooded roads or bridges; disconnect electrical appliances and gather emergency supplies; keep children away from flood waters and storm drains; Continue monitoring local radio and emergency channels for updated information throughout this emergency.
