16:30**Onset:**Sat 24 May 2025
16:30**Expires:**Sat 24 May 2025
20:00**Area:**

Volta, Greater Accra

Description:

A moderate to heavy rainstorm currently over the Gulf of Guinea is moving inland and expected to affect the eastern coast of Ghana this afternoon. The storm is expected to cast cloudiness over coastal areas and produce moderate to heavy rain with thunder and gusty winds. Tokor, Adafienu, Aflao, Agbozume, Keta, Abor, Akatsi, Anloga, Anyanui, Ada Foah, Sogakope, Ada Kasseh and surroundings are expected to be affected between 16:00 UTC and 18:00 UTC (4:00 to 6:00 PM). Sege, Prampram, Tema, Accra, Madina, Adjen Kotoku and surroundings are also expected to experience similar conditions between 16:30 and 19:00 UTC (4:30 to 7:00 PM).

Instruction:

Residents in the affected areas should complete outdoor activities and secure loose items. During the thunderstorm, stay indoors and away from windows, unplug electrical appliances to prevent damage from lightning strikes, and avoid using corded phones or electrical devices connected to outlets. If caught outdoors, seek substantial shelter immediately and never take refuge under trees during lightning activity. Drivers should exercise extreme caution by reducing speed, using headlights for visibility, and avoiding flooded sections of roadway.
