 GMet Forecast Office

24-HOUR FORECAST FOR GHANA **VALID FROM 6AM TODAY**

SUMMARY: Mostly cloudy conditions are expected to persist over Southern Ghana and give rain or thunderstorms for the coastal and inland areas this morning. Mist or fog patches are more likely to develop over the coast, forest and mountainous areas in the early hours of the day. As the day unfolds, sunshine with alternating cloud cover will dominate the south, paving way for the development of thunder and rain bearing clouds. These clouds are expected to produce thunderstorms or rain for the coast, slightly north of the coastline, middle and transition sectors from afternoon into the evening hours. The northern half will be largely sunny with isolated cases of thunderstorms or rain.

CITIES	WEATHER BRIEF
