GMet Forecast Office

24-HOUR FORECAST FOR GHANA
VALID FROM 6AM TODAY

SUMMARY: This morning, mist and fog patches are expected to form over the coastline, hilly and forested areas amidst mostly cloudy conditions. Due to low cloud cover, parts of the coast and inland areas are likely to experience slight rain or drizzle from this morning into the afternoon. Meanwhile, the northern sector will remain partly cloudy with chances of thunderstorms and rain from late morning into the afternoon. During the afternoon hours, partly cloudy weather will prevail across most areas with thunderstorms or rain anticipated over the transition and northern sectors from afternoon into the evening.

NB: Cold early morning and late evening temperatures are expected over the entire country.
