24-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table				
Likelihood ↑	High (>60%)	G	H	I
	Medium (40% - 60%)	D	E	F
	Low (<40%)	A	B	C
		Low	Medium	High
		Impact →		

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	21	27
Forest	21	28
Transition	21	27
Northern	23	30

SUMMARY: Cloudiness will continue to persist over most places within the country during the forecast period with possibility of intermittent slight to moderate rain or drizzle affecting the coast and forest areas. However, it is anticipated that **mist** and **fog patches** will form to **deteriorate visibility range** in the early hours of the morning over places within southern Ghana especially the forest and mountainous regions. Over the northern sector, the upper regions are likely to experience isolated thunderstorms and rain this morning and during the late afternoon hours.

NB: Cold early morning and late evening temperatures are expected over the entire country.

SIGNED: Central Analysis and Forecasting Office (CAFO)
