GMet Forecast Office

24-HOUR FORECAST FOR GHANA **VALID FROM 6AM TODAY**

SUMMARY: Mostly cloudy conditions are expected to prevail over most parts of the country this morning, with slight rain or drizzle likely across portions of the coastal and the in-land areas. Patches of fog and mist will also form along the coastal, forest, and mountainous areas, leading to reduced visibility during the early hours. As the day progresses, variably cloudy conditions amidst occasional breaks of sunshine will be experienced over most parts of the country. However, from late afternoon into the evening, thunderstorms or rain are likely over parts of the middle, transition and northern sectors.

NB: Cold early morning and late evening temperatures are expected over the entire country.
