24-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table				
Likelihood ↑	High (>60%)	G	H	I
	Medium (40% - 60%)	D	E	F
	Low (<40%)	A	B	C
		Low	Medium	High
		Impact →		

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	23	29
Forest	22	32
Transition	21	32
Northern	23	33

SUMMARY: The storm mentioned in the earlier update is currently producing thunderstorms or rain of varying intensities across parts of the northern, transition and middle sectors under mostly cloudy conditions. Mist and fog patches are expected to form over the coastal, hilly and forest areas during the early hours of the morning. As the day progresses, variably cloudy weather with occasional sunshine will prevail over southern Ghana, while partly cloudy weather will dominate the north. However, from late afternoon into the evening isolated to scattered thunderstorms or rain are anticipated over portions of the coast, middle, transition and northern sectors.
