|               |      |      |      |      |
| Rain          | Wind | Dust | Hail | Mist |

| Sector     | Minimum Temperature (°C) | Maximum Temperature (°C) |
|------------|--------------------------|--------------------------|
| Coast      | 23                       | 30                       |
| Forest     | 22                       | 31                       |
| Transition | 21                       | 31                       |
| Northern   | 23                       | 32                       |

**SUMMARY:** The rainstorm mentioned in the *weather warning and morning forecast* is currently producing thunderstorms with rain amidst cloudy conditions over some places within the northern and transition sectors. The cloudy conditions are anticipated to further produce some rainfall activities over the portions of the middle and coastal areas later in the day amidst breaks of sunshine.
