<b>Northern</b>	<b>23</b>	<b>33</b>

**SUMMARY:** A rainstorm currently situated over northern Togo is having a westward propagation towards Ghana. The rainstorm is likely to induce cloudiness and produce thunderstorms or rain of varying intensity over places in the northern sector of the country. Variably cloudy conditions are expected over most areas within the southern half of the country. However, from late afternoon into the evening, thunderstorms or rain of varying intensity are anticipated to affect parts of the middle, transition and northern sectors.
