Forest	22	31
Transition	22	31
Northern	24	34

SUMMARY: The rainstorm referenced in earlier forecasts will continue to affect parts of the country from this evening into the night. Another rainstorm observed over northern Nigeria is propagating westward and is expected to influence weather conditions over parts of the northern sector from late night into the morning. Early tomorrow morning, mist or fog patches will form over the coastal, forest and mountainous zones reducing visibility. Variable cloudy conditions with cases of rain will also prevail over parts of southern Ghana.
