24-HOUR IMPACT-BASED FORECAST FOR GHANA

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	23	29
Forest	22	31
Transition	22	31
Northern	24	33

SUMMARY: The rainstorm mentioned in the earlier weather warning is still moving westward and is expected to affect the southern half of the country from this evening into the night. Meanwhile, moderate thunderstorms or rain will continue to affect Eastern, Oti, Volta and Ashanti regions. Mostly cloudy conditions are expected over the capital city tonight with a chance of slight rain or drizzle. The weather should, however, be generally favorable for the Black Stars match, just remember to take an umbrella along, as slight rain is still possible. During the early hours of tomorrow, mist or fog patches are anticipated over the coastal, forest, and mountainous areas.

SIGNED: Central Analysis and Forecasting Office (CAFO)
