Description:

A band of clouds developing over central Togo are expected to intensify and spread to affect parts of the Oti region. This cloud is anticipated to produce varying intensity of rain with occasional thunder strikes and windy conditions.

Instruction:

Avoid going outside unless absolutely necessary. Stay indoors to protect yourself from heavy rain, thunder, and strong winds. Stay away from low-lying areas, riverbanks, and other flood-prone regions. If you must travel, drive with caution. Roads may be slippery, and visibility can be reduced due to heavy rain. Avoid driving through flooded areas
