24-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table				
Likelihood ↑	High (>60%)	G	H	I
	Medium (40% - 60%)	D	E	F
	Low (<40%)	A	B	C
		Low	Medium	High
		Impact →		

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	23	31
Forest	22	32
Transition	21	32
Northern	22	33

SUMMARY: Generally, mist or fog patches will form over the coastal, hilly and forest areas during the early hours of the day amidst partly cloudy conditions over most parts of the country. From mid-morning into the afternoon hours, sunny conditions with occasional cloudiness will prevail over the entire country. However, isolated to scattered thunderstorms or rain are likely to affect parts of the coastal, forested and mountainous regions (Western, Western North, Ashanti, Eastern and Oti regions), as well as few areas within the northern half from this afternoon into the evening. Partly to mostly cloudy conditions will dominate most areas during the evening hours.

SIGNED: Central Analysis and Forecasting Office (CAFO)
