

Rainfall subsided over southern Ghana

 **Urgency:** Immediate

 **Severity:** Minor

 **Certainty:** Likely

Issued:	Effective:	Onset:	Expires:
Tue 28 Oct 2025 23:07	Tue 28 Oct 2025 23:00	Mon 28 Oct 2024 23:00	Wed 29 Oct 2025 00:00

Area:
Volta

Description:
The rains anticipated earlier over the east coast has already affected parts of the Volta region. Low cloud formation within Greater Accra has also led to pockets of rain within the region. The clouds have however weakened with subsided rainfall activity. Low intensity rainfall is still anticipated within the Volta and overfew areas within Greater Accra.
