24-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table				
Likelihood ↑	High (>60%)	G	H	I
	Medium (40% - 60%)	D	E	F
	Low (<40%)	A	B	C
		Low	Medium	High
		Impact →		

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	32
Forest	22	33
Transition	22	34
Northern	22	37

SUMMARY: The weather this morning will be misty or foggy over the hilly and forested areas accompanied by partly cloudy conditions. Mostly sunny conditions are anticipated to follow for the afternoon hours with chances of localised thundery showers affecting parts of the coast, middle and transition belts later in the day. However, the upper regions are expected to be fairly dry throughout the forecast period due to intrusion of dry north-easterly winds from the Sahel (*Niger, Chad*) region.

SIGNED: Central Analysis and Forecasting Office (CAFO)
