Transition	21	33
Northern	24	37

SUMMARY: Most places within Southern Ghana will continue experiencing cloudiness with varying intensities of thunderstorms or rain this afternoon into the evening hours. Over Northern Ghana, mostly sunny conditions will be experienced this afternoon with a probability of thunderstorms or rain anticipated over some areas in the transition and savanna regions from late afternoon into the night. During the early morning hours, mist or fog patches will form over areas along the coastline, forest and mountainous areas thereby reducing visibilities.
