Transition	22	34
Northern	22	36

**SUMMARY:** Mist or fog patches is expected to develop over the forest and hilly areas of southern Ghana during the early morning hours, causing reduced visibility. Slight rains are also likely to affect few areas within the forest belt and parts of the northern sector early this morning. As the day advances, mostly sunny weather will be experienced across the country. Nonetheless, from late afternoon into the evening hours, localised thunderstorms or rain are anticipated within parts of the middle and transition sectors, as well as a few areas along the coastline.
