24-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table				
Likelihood ↑	High (>60%)	G	H	I
	Medium (40% - 60%)	D	E	F
	Low (<40%)	A	B	C
		Low	Medium	High
		Impact →		

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	23	32
Forest	22	33
Transition	22	33
Northern	22	36

SUMMARY: The early hours of this morning will be partly cloudy with mist and fog patches forming over hilly and forest areas. However, mostly sunny conditions will follow from mid-morning into the afternoon hours with a chance of formation of rain clouds that are expected to produce localised thunderstorms or rain of varying intensities over the inland areas of the coast into the middle and transition belts. Meanwhile, the upper regions of the country are expected to experience fairly dry conditions due to the intrusion of dry northeasterly winds.

SIGNED: Central Analysis and Forecasting Office (CAFO)
