Transition	21	34
Northern	23	37

SUMMARY: The rainstorm mentioned in the previous forecasts is currently producing thunderstorms and rain over the extreme western coast and its inland areas while inducing cloudiness over southern Ghana. The northern and transition sectors will experience few clouds this evening with isolated cases of rainfall over parts of the Oti, Savannah and Upper West regions. Early tomorrow morning, mist or fog patches are expected to form over the coastal, forest and hilly areas.
