

24-HOUR IMPACT-BASED FORECAST FOR GHANA

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	32
Forest	22	34
Transition	22	35
Northern	23	37

SUMMARY: Mostly cloudy conditions coupled with localised rain are already affecting parts of southern Ghana. These conditions are expected to spread out and affect more areas over the southern half of the country later this evening. The northern sector will remain fairly dry and slightly hazy throughout the forecast period. Mist or fog patches are likely to develop along the coast, hilly and forest zones early tomorrow morning.

NB: Relatively cool night temperatures are expected over the upper regions.
