Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	32
Forest	22	34
Transition	22	35
Northern	23	37

SUMMARYMostly cloudy weather is anticipated to prevail for most areas within southern Ghana tonight. However, the band of thunder and rain-bearing clouds mentioned in the earlier weather updates have moved into the south western portions of the country and they are currently producing thunderstorms with rain of varying intensities over *Prestea, Beposo, Benso, Huni Valley, Adum Trebuom* and their surroundings. However, the northern sector is anticipated to experience fairly dry and slightly hazy conditions throughout the forecast period.

NB: Relatively cool night temperatures are expected over the upper regions.
