24-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table				
Likelihood ↑	High (>60%)	G	H	I
	Medium (40% - 60%)	D	E	F
	Low (<40%)	A	B	C
		Low	Medium	High
		Impact →		

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	23	33
Forest	22	33
Transition	22	36
Northern	19	38

SUMMARY: Predominantly misty or foggy weather conditions will form and reduce visibility over the hilly and forest areas as well as portions of the coastline this morning. However, bright and sunny weather are expected to continue afterwards from mid-morning into the afternoon hours. Few cases of localised thunderstorms or rain is likely to affect parts of southern Ghana from late afternoon into the evening. Meanwhile, fairly dry and slightly hazy weather will dominate the northern sector of the country amidst hot temperatures during the afternoon.

NB: *Relatively cool night temperatures are expected over the upper regions.*
