24-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table				
Likelihood ↑	High (>60%)	G	H	I
	Medium (40% - 60%)	D	E	F
	Low (<40%)	A	B	C
		Low	Medium	High
		Impact →		

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	32
Forest	22	33
Transition	22	36
Northern	19	38

SUMMARY: During the early hours of today, mist or fog patches will form over the coastal, forest and hilly areas; reducing visibility. From mid-morning into the afternoon, sunny weather will prevail across the entire country. However, localised thunderstorms or rain are expected to affect parts of the coastline, middle and transition sectors this afternoon into the evening. Northern Ghana will remain fairly dry and slightly hazy throughout the forecast period.

NB: Relatively cool night and early morning temperatures are expected over the upper regions.

SIGNED: Central Analysis and Forecasting Office (CAFO)
