Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	32
Forest	22	32
Transition	22	34
Northern	22	37

SUMMARY: Thunderstorms or rain amidst cloudy conditions will affect places along the coastal, inland and some parts of the middle sector this morning. Cases of mist and fog patches are expected over parts of the hilly and forest areas as well. As the day advances into the afternoon, sunny weather coupled with occasional cloudiness will dominate most parts of southern Ghana whilst fairly dry and slightly hazy conditions prevail over the extreme portions of the north. From late afternoon into the evening, there is a likelihood of localised thunderstorms or rain over areas slightly north of the coastline, middle, transition and northern sectors of the country.

NB: *Relatively cool night and early morning temperatures are expected over the upper regions.*
