Forest	22	34
Transition	22	35
Northern	22	37

SUMMARY: Cloudy conditions will be observed over most places in southern Ghana. This condition is likely to induce pockets of localised rainfall activities over some parts of the coast, middle and transition areas whilst most portions of northern Ghana are expected to experience few to partly cloudy conditions with slightly hazy for the extreme portions tonight. Early morning mist or fog patches is expected to form over some areas of the coast, forest, and mountainous zones thereby affecting visibility.

NB: Relatively cool night and early morning temperatures are expected over the upper regions.
