|               |  |  |  |  |  |  |

| Sector     | Minimum Temperature (°C) | Maximum Temperature (°C) |
|------------|--------------------------|--------------------------|
| Coast      | 22                       | 32                       |
| Forest     | 23                       | 34                       |
| Transition | 23                       | 36                       |
| Northern   | 19                       | 38                       |

**SUMMARY:** Mist and patches of fog are expected over parts of the coastal, forest and hilly areas during the early hours of this morning. As the day advances, periods of sunshine and clouds will dominate over southern Ghana. From late afternoon into the evening hours, rain bearing clouds are expected to form and produce some rainfall and thundery activities over few places within the coastal, middle and transition sectors. The northern sector will remain fairly dry and slightly hazy throughout the forecast period with hot and sunny weather during the afternoon hours.

**NB:** Relatively cool night and early morning temperatures are expected over the upper regions.
