

## 24-HOUR IMPACT-BASED FORECAST FOR GHANA

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	32
Forest	23	33
Transition	22	35
Northern	22	36

**SUMMARY:** The rainstorm producing rains and thunder over parts of the forest zone is expected to spread-out, cast cloudiness and produce rains of varying intensities within the middle (*Hohoe, Peki, Akosombo, Nkawkaw, and their immediate environs*) and transition sectors this evening into the night. Fairly dry and slightly hazy conditions will persist over the northern sector. Early tomorrow morning, mist or fog patches are likely to form and reduce visibility along the coastal areas, forested and hilly places of southern Ghana.

**NB:** Relatively cool night and early morning temperatures are expected over the upper regions.
