**SUMMARY:** Early morning mist or fog patches will form over places within the southern half of the country, reducing visibility. Sunny weather with occasional cloudiness will prevail across southern Ghana as the day progresses. However, localised thunderstorms or rain are expected to affect parts of the coastline and the inland areas. Parts of the northern sector will continue to experience varying intensities of the dry and hazy conditions amidst sunny and hot temperatures in the afternoon.

**NB:** Relatively cool night and early morning temperatures are expected over the upper regions.
