## 24-HOUR IMPACT-BASED FORECAST FOR GHANA

| Weather Forecasting Risk Table |                    |          |        |      |
|--------------------------------|--------------------|----------|--------|------|
| Likelihood ↑                   | High (>60%)        | G        | H      | I    |
|                                | Medium (40% - 60%) | D        | E      | F    |
|                                | Low (<40%)         | A        | B      | C    |
|                                |                    | Low      | Medium | High |
|                                |                    | Impact → |        |      |

| Weather Icons |      |      |     |      |      |
|---------------|------|------|-----|------|------|
|               |      |      |     |      |      |
| Rain          | Wind | Dust | Fog | Hail | Mist |

| Sector     | Minimum Temperature (°C) | Maximum Temperature (°C) |
|------------|--------------------------|--------------------------|
| Coast      | 22                       | 32                       |
| Forest     | 22                       | 34                       |
| Transition | 22                       | 35                       |
| Northern   | 21                       | 37                       |

**SUMMARY:** Thunderstorms or rain of varying intensity are anticipated to affect parts of the coastline and nearby inland areas this morning. Mist and fog patches will form over the forest and transition zones during the early hours amidst partly cloudy conditions. As the day progresses, generally sunny conditions with occasional cloudiness will prevail across southern Ghana. However, thunderstorms or rain are expected to develop over parts of the country from the afternoon into the evening. Northern Ghana will experience mostly sunny weather with slightly hazy conditions and a chance of thunderstorms over the savannah and northern regions.

**NB:** Relatively cool night and early morning temperatures are expected over the upper regions.
