Rain	Wind	Dust	Fog	Hail	Mist

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	23	32
Forest	22	33
Transition	22	34
Northern	21	36

SUMMARY: This morning, mist and fog patches are expected to form along the coastline, forest and mountainous areas with reduced visibility. As the day unfolds, sunny weather amidst occasional cloud cover will dominate most areas within the country. Formation of rain clouds are expected to produce localised thunderstorms or rain for the *west coast, middle and transition sectors* from afternoon into the evening hours. However, the northern sector will remain slightly hazy with the likelihood of localized thunderstorms or rain later in the day.

NB: *Relatively cool night and early morning temperatures are expected over the upper regions.*
