Rain	Wind	Dust	Fog	Hail	Mist

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	33
Forest	23	33
Transition	20	34
Northern	21	37

SUMMARY: Mist or fog patches are expected to form over some areas of the coast, forest and mountainous zones which may affect visibility range for most places within southern Ghana this morning. As the day unfolds, fair and sunny weather will dominate all sectors with the northern half of the country experiencing fairly dry and slightly hazy conditions throughout the forecast period. However, there is the likelihood of localised thunderstorms or rain over parts of the coast, its immediate inland areas, and the middle sector from late afternoon into the evening.

NB: Relatively cool night and early morning temperatures are expected over the upper regions.
