Gmet Forecast Office

24-HOUR FORECAST FOR GHANA

VALID FROM 6 PM, 23/12/2025

SUMMARY: Partly cloudy weather will predominantly prevail over southern Ghana this evening into the night. There are however some localized developments of rain bearing clouds which are expected to cast cloudiness and produce thunderstorms or rain over the middle sector (**Achiase, Dadieso, Assin Bereku, Jedua and surrounding vicinities**) this evening. Slightly hazy weather will continue to dominate the northern sector of the throughout the forecast period. Early tomorrow morning, mist or fog patches are likely to develop over the coast, mountainous and forest zones.

NB: Relatively cool night and early morning temperatures are expected over the upper regions.
