## 24-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table			
Likelihood ↑	High (>60%)	G	H
	Medium (40% - 60%)	D	E
	Low (<40%)	A	B
		Low	Medium
		Impact →	

Weather Icons					
Rain	Wind	Dust	Fog	Hail	Mist

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	32
Forest	23	34
Transition	21	36
Northern	22	39

**SUMMARY:** Generally, misty or foggy weather conditions will form over mountainous and forest areas as well as portions of the coast during the early hours of the morning. Visibility range is expected to be affected by this weather condition therefore motorists are advised to take precautionary measures on the road. However, this weather condition will clear and give way to bright and fair weather with varying degrees of temperatures across the entire country. There are chances of localised thundery showers likely to affect some places within inland areas of the coastline, middle and transition sectors later in the day. The northern sector will remain in dry and slightly hazy conditions throughout the forecast period.

**NB:** *Relatively cool night and early morning temperatures are expected over the upper regions.*
