Coast	24	33
Forest	23	34
Transition	23	36
Northern	22	39

SUMMARY: Mist and fog patches are expected to develop during the early morning hours over portions of the coast, forest and mountainous areas, as well as Bole and its surrounding communities. As the day progresses, generally fair weather will dominate most parts of the country, with occasional cloud cover over some southern areas. These cloud buildups may trigger localised thunderstorms or rainfall along the coast, slightly inland from the coastline and middle sectors. Areas such as *Elubo, Axim, Takoradi, Jukwa, Akroso, Bawjiase, Twifo Praso, Konongo, Abokobi, Teacher Mante* and their immediate *environs* are likely to experience rainfall of varying intensities from the afternoon into the evening. Meanwhile, northern Ghana will remain dry and slightly hazy throughout the forecast period, with hot and sunny conditions prevailing during the afternoon.

SIGNED: Central Analysis and Forecasting Office (CAFO)

NB: Relatively cool night and early morning temperatures are expected over the upper regions.
