GMet Forecast Office

24-HOUR FORECAST FOR GHANA

VALID FROM 6AM (09/01/2026)

SUMMARY: A moderate rainstorm currently over the border of Togo-Benin is making a westward propagation towards Ghana. The rainstorm is likely to produce thunderstorms or rain of varying intensities along the coastline and inland areas this morning into the afternoon hours. Mist and fog patches are likely to develop over the forest and mountainous areas early this morning. Advancing into the afternoon, mostly cloudy weather with alternating sunshine will prevail over the coast and inland areas with localized thunderstorms or rain affecting few places in the middle sector of the country. The northern sector will continue to remain dry and slightly hazy throughout the forecast period with hot and sunny conditions prevailing during the afternoon hours.

NB: *Relatively cool night and early morning temperatures are expected over the upper regions.*
