

24-HOUR IMPACT-BASED FORECAST FOR GHANA

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	32
Forest	23	33
Transition	22	36
Northern	18	38

SUMMARY: Mostly cloudy conditions are anticipated along the coastline and some inland areas this evening. Ongoing localised thunderstorms or rain are expected to persist over a few coastal areas and parts of the middle sector into the night. *Areas including Twifo Praso, Achiase, Tarkwa, Hiawa, Teacher Mante, Dodowa, Akosombo, Somanya and their surrounding communities are likely to experience moderate to heavy rainfall, accompanied by thunderstorms.* Meanwhile, dry and slightly hazy conditions will continue to dominate the northern sector and portions of the transition belt throughout the forecast period. By early tomorrow morning, mist or patches of fog will form over coastal, forest and hilly areas, leading to reduced visibility.

NB: Relatively cool night and early morning temperatures are expected over the upper regions.
