Coast	23	34
Forest	22	34
Transition	22	36
Northern	21	38

SUMMARY: Partly cloudy conditions will prevail across most parts of southern Ghana this morning, with mist or fog patches expected over the coastal, hilly and forest zones during the early hours. From mid-morning into the afternoon, mostly sunny weather with intermittent cloud cover will dominate southern Ghana. However, localised thunderstorms or rain are anticipated to affect a few locations along the coast, some inland areas and parts of the middle sector from the afternoon into the evening. Northern Ghana is expected to remain dry and hazy throughout the forecast period.

NB: Relatively cool night and early morning temperatures are expected over the upper regions.
