Coast	24	34
Forest	23	34
Transition	21	36
Northern	18	37

SUMMARY: Misty and foggy conditions are likely across the coastal, forested and mountainous areas of southern Ghana this morning amidst partly cloudy conditions. As the day advances, a mix of sunshine and clouds will prevail over southern Ghana. From late afternoon into the evening, the development of rain-bearing clouds may trigger localised thunderstorms or rainfall over parts of the coast, inland areas and the middle sector. Meanwhile, northern Ghana will remain dry and hazy throughout the forecast period, with sunny conditions expected during the afternoon.

NB: Relatively cool night and early morning temperatures are expected over the upper regions.

SIGNED: Central Analysis and Forecasting Office (CAFO)
