

## 24-HOUR IMPACT-BASED FORECAST FOR GHANA

| Sector     | Minimum Temperature (°C) | Maximum Temperature (°C) |
|------------|--------------------------|--------------------------|
| Coast      | 24                       | 32                       |
| Forest     | 23                       | 33                       |
| Transition | 22                       | 36                       |
| Northern   | 18                       | 38                       |

**SUMMARY:** Localised thunderstorms or rain is expected over few places of the coast, inland and middle sector. Places such as Ayanfuri, Insu, Twifo Praso, Assin Fosu, Achiase and their surroundings. However, varying dry and hazy weather will persist for some parts of the middle, transition zone and northern Ghana for the forecast period with visibility ranging between 1km and 8km particularly across northern Ghana. Mist and fog patches will form over parts of the coastline, mountainous and forested zones which may affect visibility tomorrow morning.

**NB:** Relatively cool night and early morning temperatures are expected over the upper regions.
