Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	33
Forest	23	34
Transition	21	34
Northern	20	38

**SUMMARY:** Early this morning, patches of mist or fog are likely to develop over the coastal, forested and mountainous areas of southern Ghana. As the day progresses, sunny conditions will prevail over most places in southern Ghana. However, localised rain-bearing clouds are likely over a few places along the coastal, inland areas of the coast, as well as the middle sector from late afternoon into the evening hours. Meanwhile, the northern and transitional zones of the country will experience dry and hazy conditions throughout the forecast period with a visibility ranging between *2km and 8km*.

**NB:** Cold night and early morning temperatures are expected over the northern sector.
