Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	33
Forest	23	34
Transition	22	37
Northern	18	38

**SUMMARY:** Localized developments of rain clouds coupled with a weak rainstorm over the southern borders of Benin and Nigeria into the Gulf of Guinea are expected to cast cloudiness and trigger some thunderstorms or rain along the coastline, slightly north of the coastline into the middle part of the country this evening into the night. Dry and hazy will continue dominating northern Ghana throughout the forecast period. Early morning mist or fog patches will form and reduce visibility over coastal areas as well as the mountainous and forest zones.

**NB:** Cold night and early morning temperatures are expected over the northern sector.
