Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	34
Forest	23	35
Transition	22	36
Northern	20	35

SUMMARY: Early this morning, patches of mist or fog are expected to develop along the coastal areas, as well as the forested and mountainous places, leading to reduced visibility. Afterwards, sunny conditions with occasional cloudiness will prevail across southern Ghana. However, from late afternoon into the evening, localised thunderstorms or rain are likely to occur over a few areas along the coast, nearby inland areas, and parts of the middle sector. Meanwhile, the northern and transition sectors will continue to experience dry and hazy conditions, with visibility ranging between *2km and 8km* throughout the forecast period.

NB: Cold night and early morning temperatures are expected over the northern sector.

SIGNED: Central Analysis and Forecasting Office (CAFO)
