Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	33
Forest	23	34
Transition	20	36
Northern	21	36

SUMMARY: Predominantly, misty or foggy weather conditions are expected to deteriorate visibility range for most hours of the morning over southern Ghana whereas the northern half experiences dry and hazy weather conditions. Motorists are advised to take precautionary measures during this period. However, the misty conditions over southern Ghana are expected to change to slightly hazy weather conditions with sunny periods during the afternoon hours as the north continues to experience intense dryness with hazy sunshine. Visibility range across the entire forecast validity period is anticipated between *500 meters to 8000 meters*.

NB: Cold night and early morning temperatures are expected over the northern sector.
